

Vagiwell® Dilators

Medical dilators made of silicone.

Use:

The goal of the exercises is stretching (expanding) of the vagina.

The Vagiwell® dilator set is suitable for clinical and home use.

Starting with the smallest size, the dilator is introduced into the vagina and is kept there for several minutes. When one size can be introduced without any discomfort, move directly to the next size. The exercises should be performed in a relaxed sitting or lying position.

Unless prescribed otherwise by the physician, the exercises should be repeated daily. When the largest dilator can be inserted without any discomfort, sexual intercourse can be attempted.

Size	Color	Diameter A/B		Length C	
		mm	inch	mm	inch
Size 1	Light blue	12/14	0.47/0.55	122	4.80
